leaders

Recent Client Testimonials - Oct '25

- “For a senior technical person, the best of this course is setting a structured and methodical approach for evaluation techniques we already use. It would be also very beneficial to senior managers (100+ reports). There is a huge hype on Gen AI at the moment, and this course will help them see the potential, current limitations and pitfalls of this technology.”
- “Overall an excellent course that has provided me with many new angles to approach my daily role.”
- “Our instructor had a wealth of knowledge and could relate any discussion with practical experience, which kept it interesting.”
